

MR.STEAM® ANNOUNCES ADDITIONAL CU STEAMBATH ACCESSORIES

Introducing the CU Light, CU Speakers, CU Steam Stop and the CU Alarm

LONG ISLAND CITY, N.Y. (March 2010) – [Mr.Steam](http://www.mrsteam.com) is pleased to announce the launch of four additional commercial steambath products that will strengthen its broad line of steambath merchandise. All products are ideal for commercial applications such as day spas or resort spas.

“With the addition of these CU Steambath accessories, we are looking to provide commercial steambath users with the amenities of light, sound and security,” commented Martha Orellana, vice president of sales and marketing for Mr.Steam. “We are always looking for innovative ways to enhance the steambathing experience.”

CU Light – The ENERGY STAR rated CU Light is a stylish, robust surface mounted architectural light designed for commercial environments. It has an aluminum body, finished in brushed chrome and is approximately 8.5 inches in diameter and 4 inches in height.

CU Speakers – Designed for use inside the shower enclosure, users will enjoy soothing tones with two 8.5 inch diameter flushmount two-way speakers. Suitable for most sources of audio input, these speakers are made with ABS frames and white powder-coated grills. The CU Speakers are rated at 70 watts of peak power with full range sound.

CU Steam Stop – Suitable for use inside or outside the steam room, the water-resistant steam stop switch will shut down the steam generator. To further increase ease of use, multiple steam stop switches can be used with one steam generator.

CU Alarm – In the event the steam room maximum set temperature is exceeded, an audible alarm will sound. The alarm mounts in a standard 4 inch by 4 inch electrical box and is not for installation inside the steam room. Choose from multiple alarm sounds. The CU Alarm can easily be combined with the CU Digital 1 Control.
